

SPLATZONE! **PAINTBALL**

FREQUENTLY ASKED QUESTIONS!

DOES IT HURT?

The impact of getting shot by a paintball is about the same as the snap of an elastic band. With the safety equipment we provide combined with proper clothing you will have a winning combination for a day full of fun!

Now with the new Low Impact paintball guns the sting is reduced to about 1/3 of standard paintballs, so even the younger kids and first time players can enjoy, but there is still a little sting depending where you get hit!

WHAT SHOULD I WEAR?

The most important thing you need to wear is an approved mask. The great thing is that this is included in all of our rental equipment packages for no additional cost! Now for the rest of your body we find that loose fitting clothing helps to reduce the sting of paintball. Full length pants, and a long sleeved shirt or a hoodie are suggested. For those not wanting to get their clothes dirty we offer coveralls, jackets, and gloves for rent!

DOES IT WASH OUT?

Did you know that paintballs don't actually contain any paint? Paintballs are made with a gelatin capsule filled with a non-toxic, biodegradable, water soluble gel. At Splatzone we only use paintballs with white fill. This means you won't be getting any bright orange, pink, or yellow stains all over your clothes. All of the paintballs at our field will wash out easily.
